- b) You use WAP GPRS accepting full risk and responsibility in doing so;
- c) You acknowledge that Amichi and the Network does not check and is not obligated to monitor the content of information or material available from WAP GPRS or the internet and that Amichi and the Network are not liable for loss and damage suffered by You or any other person as a result of using information or material obtained using WAP GPRS or the internet, including but not limited to, loss or damage caused by a virus; and

- d) You will not use WAP GPRS for any activities which breach any laws, standards or codes or infringe a third party's rights, or breach any statements, content requirements or codes promulgated by any relevant authority including activities which require Amichi or the Network to take remedial action under any applicable industry code or in a way which interferes with other users or defames, harasses or menaces or restricts or inhibits any other user from using or enjoying the Services or the internet.

21 Service Charges

21.1

The charges for the Services may depend on:

1. a combination of airtime, time and day of call, destination of call and call type; and
2. the rate plan and features selected by You in Your Order.

21.2

You will not be charged for Unsuccessful Calls.

21.3

The rate plan(s) offered by Amichi in connection with the supply of the Services, as set out in the Standard Rate Table, specify:

- a) the charges for outgoing calls made on the Service, including local, national, international, mobile and other call types;
- b) the charges for other Services, including SMS, MMS, GPRS, and Voicemail;
- c) the Access Fee;
- d) the Call Credit Expiry Date; and
- e) the Grace Period.

21.4

The other call types referred to in clause 21.3 include calls to:

- a) special Services such as 13, 1300, 113, 013, and 123 services;
- b) special Services such as 1800, 0011 800, and 0014 800; and
- c) calls to ships at sea.

21.5

The charges for outgoing calls using the Services are generally based on a specified period of time (for example thirty or sixty second intervals) over the Chargeable Calling Time plus a flagfall charge when the call is answered. Some calls may be charged on a per call or data usage basis, as specified in the Standard Rate Table.

21.6

You will be charged for calls by deductions from the current Call Credits in Your Account, in accordance with the Standard Rate Table.

21.7

You will not be sent any bills, invoices or statements recording calls made from Your Phone using the Services. You are able to review Your last three calls made by calling 126 168. You may request usage charge records and we will charge you for the usage charge records you request.

21.8

For technical reasons, calls made to '13' numbers of other Suppliers from the Services in regional areas will not always be terminated by the other Supplier at the desired answering point. However, they will be answered by the company to whom the '13' number has been assigned in a capital city of Australia. Amichi is not responsible for the particular routing of calls to '13' numbers of other Suppliers.

21.9

For the purposes of determining the time at which a call is placed, the time used will be the local time recorded at the first mobile switching centre through which the call passes. This will not necessarily be the local time at the place at which You, the calling party, are located. If the charge for the Services depends on the time and day of call, the charge will be calculated using the applicable rate when the call starts.

21.10

You cannot convert into cash or redeem call credits as cash and You cannot apply call credits against any other Services held by You or anyone else with Amichi.

21.11

Any call credits remaining on Your Account on termination of this Agreement are forfeited.

22.2

- a) Low Account Balance -- if You are using the Services when Your Account Balance falls below \$1.00 You will hear an audible alert to alert You that Your Call Credits are low and that You may want to Recharge. Amichi will endeavour to send You a text message stating the following “Low credit notification, you have less than \$1.00 remaining, please recharge to ensure that you can continue using your mobile”
- b) Low call time -- if You are using the Services when Your Account Balance falls to the level where it only contains enough Call Credits for a further sixty (60) seconds of call time on Your current call, You will hear an audible alert to alert You that Your Call Credits are low and that You may want to Recharge. Amichi will endeavour to send You a text message stating the following “You have 60 seconds talk time remaining, please call 126166 to recharge”
- c) First call of the day -- if Your Account Balance is below \$1.00 You will hear a recorded message when you make Your first call of the day, informing You that Your Account Balance is low and that You may want to Recharge. 23.2

If Your Account Balance falls to zero, through Your use of the Services, including the application of the Access Fee, the Grace Period will begin for Your Account.

23.3

You must add Call Credits to Your Account before the expiration of the Grace Period otherwise Amichi can disconnect You from the Network irrevocably without notice. If this happens You will lose Your MSN and Amichi will be unable to get it back for You.

23.5

If You add any Call Credits to your Account before the expiration of the Grace Period, Your access to the Services will be fully restored.

23.6

Amichi reserves the right to, but need not, send You SMS and/or e-mail reminders to warn You that if You do not add Call Credits before the expiration of the Grace Period, Your access to the Services will be disconnected.

26 Lost or Stolen Phone and/or SIM Cards

26.1

The Amichi IMEI Blocking facility ("IMEI Blocking") allows You to block Your Phone on the Network and on other Australian GSM networks if Your Phone is lost or stolen.

26.2

You may block Your Phone by e-mailing Amichi at customercare@amichimobile.com.au and requesting IMEI Blocking. This will prevent Your Phone being used on the Network. Amichi will try to do this within a reasonable period. You will be required to undergo an ID check before IMEI Blocking is activated.

26.3

If Amichi blocks or unblocks Your Phone on the Network, this will be communicated to other national Carriers to put into effect on their networks.

26.4

If Your Phone is found or returned, You must e-mail Amichi at customercare@amichimobile.com.au to request unblocking. Amichi will try to do this within a reasonable period.

26.5

If You need to call emergency services while Your phone is IMEI Blocked, please dial 112 rather than 000. Provided You are within coverage, this will ensure that Your call gets through to emergency services while waiting for Your unblock request to be carried out.

26.6

If You obtain a Phone that is lost or stolen, or obtain the Services or a Phone under false pretences, Amichi may block Your Phone on the Network without Your consent, even if You are not aware it is stolen.

26.7

Amichi is not responsible for any lost or stolen SIM cards. You will be responsible for the charges for all Services used by any other person using Your lost or stolen SIM card.

27.6

If You have received calls of a harassing nature and reported the matter to the relevant law enforcement agency, You may request a new MSN. Amichi may, at its discretion, agree to supply You with a new MSN. If Amichi agrees to do so, a new MSN will be issued to You free of charge on the first two occasions. Appendix 1 -- Amichi Pre-Paid Service Features

Caller ID (Calling Line Identification, CLI)

The CLI facility allows You to send Your MSN when making phone calls and to receive the phone number when called from a service which has the facility to send calling line identification (CLI). Your MSN will be sent with each call made using the Service unless the facility is blocked.

If You do not block CLI in respect of calls made from Your Phone You agree that when a call is made from Your Phone Your MSN may be sent automatically to the equipment of the called party. This default service allows You to:

- identify an incoming caller by his/her phone number before You answer their call; and
- send Your MSN when You make a call.

You agree that if a party calling Your Phone has not blocked CLI in respect of a call made from their equipment, the service number of the calling party may be displayed on the screen of Your Phone at the time the call is made.

You may also be able to activate or de-activate the service through a function on Your Phone, if it has the necessary technical capability.

You can block the facility for all calls made and received by disabling this function via Your phone or emailing customercare@amichimobile.com.au and requesting the facility be blocked for the Service.

You agree that when sending an SMS MO and/or MMS MO message, Your MSN or name may be sent automatically to the equipment of the called party and that Your MSN or name cannot be blocked in respect of such calls.

A receiving party's phone equipment may not have the capability to display the MSN of the calling party despite the calling party's intention to transmit this information to the called party.

If You are an unlisted customer, unlisted service information is marked and controlled in the integrated public number database (IPND) so that it is not disclosed, for example, to directory information organisations providing published directories or directory assistance services. The information held in the IPND may only be provided for an approved purpose to those approved data users such as directory information organisations or for the assistance of emergency service organisations or law enforcement agencies.

You must contact Amichi via e-mail at customercare@amichimobile.com.au if You wish to have Your basic IPND data altered in any way.

Voicemail

Voicemail provides functionality similar to an answering machine. You can record a personalised greeting of up to 2 minutes long for callers to hear. Voicemail will store a maximum of 20 messages each up to 5 minutes long.

There are four options when diverting a service to Voicemail.

Conditional diversions based on:

- call not answered;
- number busy; or
- number not contactable (eg. out of range or turned off)

or unconditional diversion based on:

- all calls.

When a caller leaves a message on Your Voicemail, the Network will attempt to send a message waiting indicator to Your Phone (some older style phones may not support this indicator). If Your Phone is not within coverage or is turned off, the Network will continue to send the message waiting indicator for a period of up to 7 days or until the message wait indicator is received by the Phone.

You can call in to listen to callers' messages at a convenient time. Voicemail messages are stored in Your Voicemail box for 7 days, whether heard or not heard.

Voicemail provides the Voicemail Call Return which may allow You to return a call without exiting the Voicemail box. Voicemail Call Return is only available when You access Your Voicemail box from Your Phone. This feature is based on the ability of the Voicemail box to capture the caller's telephone number; to record a number entered by the caller; and to allow You to enter a telephone number to return the call.

The caller's telephone number will not always be captured by the Voicemail box including when:

- the caller's line has a temporary (call by call basis) or permanent (including a silent line or when the caller's Supplier does not provide the CLI facility) block on sending CLI;
- the call was an international call;
- the call was from a payphone;
- the number was overridden by a number entered by the caller.

When the Voicemail Call Return call is completed, You are still connected to the Voicemail box and so can continue to access remaining Voicemail messages.

Some numbers, including international numbers, 13, 1300, 1900 and emergency services numbers, when entered by the caller or You, will not be accepted as call return numbers.

SMS

SMS enables You to send short text messages, up to 160 characters in length, from Your Phone. This is technically known as Short Message Service 'Mobile Originated' (SMS MO) and generally as 'SMS'. You should note that Your MSN will be sent automatically as part of the SMS MO service.

SMS messages can be sent and received by You in Australia on participating Suppliers' networks.

The recipients of the SMS message must also be within coverage of their participating Supplier's network to receive the SMS message on the screen of their phone.

If Your Phone is turned off, or out of coverage, the SMS message will be resent for up to 7 days, (after which it will be deleted) or until the message is received. The message is stored on the network for 7 days before it is deleted.

There may be a delay between when an SMS message is sent and when it is received. You cannot send Web SMS, group SMS or e-mail SMS.

Some older style phones may not support this feature (to either send or receive).

All SMS messages are charged regardless of whether they are successfully delivered or not. It may take up to 8 days from the original send date for message charges to be applied.

There is no charge to receive an SMS message other than for SMS 'Mobile Terminated' (SMS MT) messages which will be charged at the advertised rate set by the SMS MT provider.

There may be a delay between when a message is sent and when it is received. Amichi will not accept any liability for any loss or damage as a result of a delay in receiving a message, a message not being secure or not received. You indemnify Amichi for any loss Amichi may suffer in connection with SMS messages sent by You.

You acknowledge that CLI cannot be turned off for SMS Services

Premium SMS

Premium SMS messages are messages that can be sent from SMS compatible handsets, for example to enter competitions. Premium SMS messages are charged at the advertised rate set by the Premium SMS provider.

Call Hold and Call Wait

Call Hold/Wait allows You to put a caller on hold and either receive or make another call.

You cannot speak with both callers at the same time (i.e. Conference calling is not available).

The following codes are for activation/deactivation of Call Hold/Wait from Your Phone:

- Activate: *43#send
- Cancel: #43#send

MMS (Multimedia Messaging Service)

The MMS service provides You with the ability to send and receive MMS messages as a combination of text, photos, animations, video or sound on compatible phones. Not all MMS phones support all features of the service.

MMS messages sent from MMS compatible phones are known as Multimedia Messaging Service 'Mobile Originated' (MMS MO). You should note that Your MSN may be sent automatically as part of the MMS MO service.

To activate MMS, You must request WAP GPRS and record Your MSN on the MMS Profile Server. You must provision Your Phone to send and receive MMS. Amichi cannot provision all MMS-capable phones for use on the Network and accepts no liability for inability to provision a phone for use with MMS. Customers who attempt to use MMS without following the activation process (e.g. by using a GPRS-enabled SIM card with an MMS compatible phone) may be charged for MMS messages whether the message is successfully delivered or not.

Messages in MMS format can be sent and received between customers in Australia on the Network, if You have an MMS compatible phone and have activated MMS (MMS customers). MMS Customers can also send and receive messages in MMS format with people connected to most other mobile networks in Australia.

MMS customers cannot send and receive messages in MMS format with other customers who do not have an MMS compatible phone and who are not activated for MMS or with people connected to mobile networks in Australia or overseas where there is no MMS interconnection arrangement in place.

If You are a customer whose phone and service is provisioned for WAP GPRS, You can send MMS messages from Your Phone using Wireless Application Protocol (WAP). The form of content that can be sent is limited to text and photos. The ability to preview photos will depend on Phone functionality.

If an MMS message is sent to a mobile phone that cannot receive the message in MMS format the recipient of the message will be sent a Short Message Service (SMS) message telling the recipient their message can be viewed on the internet. The recipient will need to have an SMS compatible phone and service to receive this message. The recipient can access the message via the website for up to 30 days before deletion by Amichi.

If Your Phone and service is provisioned for WAP GPRS, You can view MMS messages on Your Phone using WAP GPRS. Message recipients may not be able to view all components of the message (for example, they may only be able to view text in the message but not any images in the message). Such recipients will still be sent an SMS message allowing them to view their message on the internet as set out above.

Recipients of MMS originating messages must be within the coverage of their participating supplier's mobile digital network to receive a MMS or SMS message on the screen of their phone. If a recipient's phone is turned off, or out of coverage, the MMS or SMS message will be resent for up to 7 days (after which it will be deleted) or until the message is received.

There may be a delay between when a message is sent and when it is received. Amichi will not accept any liability for any loss or damage as a result of a delay in receiving a message, a message not being secure or not received. You indemnify Amichi for all loss Amichi may suffer in connection with MMS messages sent by You.

MMS can only be disabled by removing the MMS settings from Your Phone. Amichi will not accept any liability for inability to disable MMS or for the removal of settings from Your Phone.

Amichi may discontinue, suspend or change MMS at any time.

CLI cannot be turned off for MMS Services

GPRS WAP

GPRS WAP uses Wireless Application Protocol (WAP) to provide access from compatible Phones in Australia to some interactive information, email and services.

Information will be sent to Your Phone by the General Packet Radio Service (GPRS). The service is only available if You have a Phone that can transmit and receive data in GPRS form. You should check with Your handset manufacturer if Your Phone is compatible.

You must be in Network coverage to use GPRS WAP services.

Amichi gives no warranties about the accuracy, timing or currency of any information provided as part of this service. You should not rely on this information and should seek independent advice.

You indemnify Amichi against any loss or damage suffered or incurred, directly or indirectly, as a result of reliance upon any information received on the GPRS WAP service
